

**Understanding.**

Chances are, you spend a lot of time sitting. And chances are you probably don't spend much time thinking about your chair. That's okay ... we do. We listen, observe, experiment, and learn how to best support your body at work.

Understanding how you work means we can offer seating that makes you more comfortable. And ultimately more productive.

Innovation.

We strive to bring innovative seating solutions to our customers. The result is nearly 200 seating products (and almost 200 seating patents*), all designed to support you, wherever you work.

Many of these products set a new standard for seating. We introduced the flexing chair shell that moves with you, telescoping arms that better support keyboarding, and revolutionized seating comfort with the Live Back™ technology.

Commitment.

A strong commitment to customers and innovation drives what we do. And our dedication to quality maximizes your investment over time. To us, quality means creating products that are beautiful, durable, and environmentally responsible.

We are committed to keeping pace with some of the most demanding workplaces in the world ... yours.

Find everything from your primary work chair to a stacking chair, to seating for meetings, learning, and collaborating. It's all right here.

*Currently issued US design and utility patents.

Consider the following to help select the right chair.

Will it be a primary work chair?

Look for a work chair with ergonomic features that support healthy postures and reduce physical stress during long periods of sitting. Does the chair encourage movement? Does it have a range of adjustments to accommodate diverse individuals? Is it easy to adjust?

Will the chair be shared?

Look for a chair that can accommodate multiple users and fit the purpose of the space. Will the seating be used for a team room, conference room, classroom, guest seating, or casual meeting place?

Look for seating that can turn any space into a place to gather, meet, wait, or relax. Some of the brightest ideas happen away from a desk. The seating you choose can inspire everything from a fun hangout space to a sleek, sophisticated space ... or anything in between.

What about cost?

Initial costs are easy to determine. But what about long-term costs? You'll find long-term value in the chair's durability and warranty. For a work chair, the right solution can even contribute to a person's health and well being.

Ally

Features:

- Flexing frame
- Pivoting back
- Stacks 3-high with arms, 4-high without arms
- Soft glides available

Statement of Line:

Open arms

Armless

Jersey guest

Features:

- Available with arms or armless, with glides or casters
