## A V E A ...there's more than meets the eye

At first glance the Avea Table Series reflects a clean and simple design that supports many multifunctional meeting environments... from a single glass conference table... to a modular seminar table grouping with power, media support, and storage units.

At second glance it is a program that offers a unique modular table system that allows the tables to be completely disassembled with no tools and stored on a cart for easy transport.

(Plasma TV not included)

*modular table:* four AV-2012-MM-AL, two AV-2090-MM / 7000 Maple / Aluminum; four AV-2000-MP-AL Aluminum; two AV-Elec 3 Outlet Cable with Plug and Corner Connecting Cable

special mechanism that holds A-frame leg in place

tilt leg backwards towards slot

drop leg into slot at an angle

## AVEA Modular Tables ...simple, easy, and no tools

The modular table program from AVEA is based on a special mechanism designed just for Davis by Martin Ballendat.

Rather than offering a typical folding table leg, this mechanism allows for the leg to be removed (with no tools) and stored on a cart for transportation to a new meeting area or just for storage. Cart stores up to five tables, ten legs, and accessories.

The Avea table cores are constructed of a balsa core, which makes the tables extremely lightweight and perfect for reconfiguring or placing tops on the cart for storage.

Anodized aluminum legs are joined together with a cast aluminum cap that is used as the connecting element that locks into the mechanism in the same fashion as a ski boot clips into a ski. A simple turn of the knob clockwise will release the leg.

Tables may also be ordered with fixed legs if tables will not be stored, which will help meet many budget parameters.

*table:* AV-2012-LAM-AL 60 x 32 Modular Table with two removable legs, two connectors, wire management, and electrification.

AVEA Modular Tables...  
versatility and functionality in clean design

A complete conference environment can be created for any size or shape boardroom. Easy to layout and easy to assemble and disassemble with the removable leg mechanism. If tables are going to be stationary, then fixed legs may be ordered to save the cost of the mechanisms.

Credenza storage units offer flip-top storage for service ware and file drawers in bottom. The mobile technology cart serves as projector and laptop support, or can be used as a service cart.

## Avea Modular Table Series...wiring options

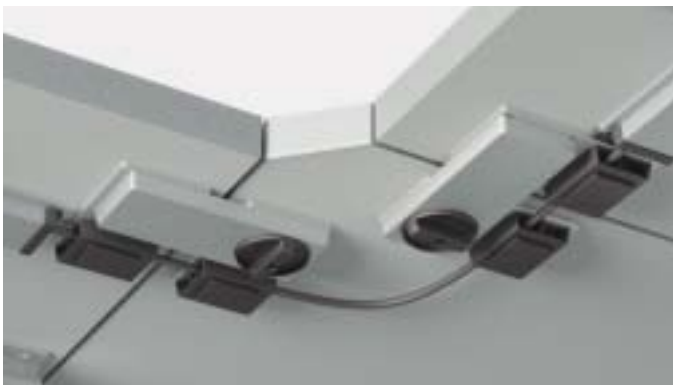

The Modular Table System has a daisy-chain electrification system that is comprised of five different units that can be connected to wire any type of configuration. First, determine where the floor monument or plug will be located and start at that leg with the correct units that complete the run of the table. You may connect up to four tables per outlet plug.

bumper that is used to stack tables opens up to hold wire

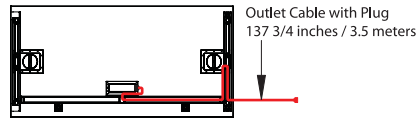

snap bumper back into place and wire can continue to next table

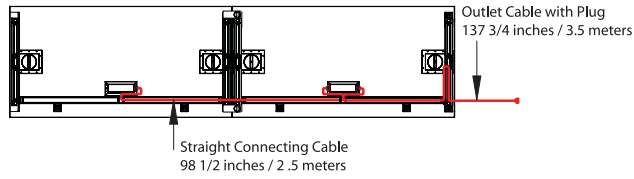

wire is held into place by bumpers on corner top

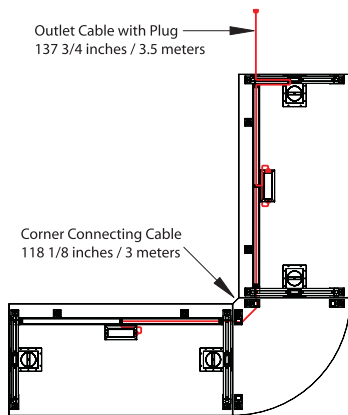

built-in wire management in leg feeds wire to floor

## AVEA Conference Tables...freestanding tables

The conference tables offered in the Avea Collection are all freestanding tables with fixed legs. These tables may be used in a variety of applications...from a glass table as a table desk...to a large 112" x 48" boardroom table.

All sizes are offered in veneer or laminate with the same aluminum "look" edge with a plastic coating for protection. A rotating electrical and data port unit may be specified for veneer or laminate tops. The unit rotates to expose the plug area. A wire trough is also included that extends from leg to leg to enable the plug wire to extend down either side of the table.

Two smaller tables are offered in clear, frosted, or white painted-bottom glass.

Add the media or storage units to these tables and you have an instant functional boardroom.

*storage:* AV-3000-CC-AL Media Center; AV-3400-CC-AL Technology Cart / 4000 Cherry / Aluminum

*conference table:* AV-1210-CC-AL 112 x 48 Rectangle Table with Fixed Legs and Elec/Data/WM Unit / 4000 Cherry / Aluminum

*shown with:* Lucid 11-CHCH-CH Upholstered Back Executive Chairs

AV-1000-GL-AL - 78 x 40 Rectangle Table with Fixed Legs / Clear Glass  
Also available in Veneer and Laminate with Elec/Data/WM Unit

AV-1000-GL-AL - 78 x 40 Rectangle with Fixed Legs / Frosted Glass  
Also available in Veneer and Laminate with Elec/Data/WM Unit

AV-1000-GL-AL - 78 x 40 Rectangle with Fixed Legs / White Painted Bottom Glass  
Also available in Veneer and Laminate with Elec/Data/WM Unit

AV-1100-BB-AL 88 x 42 Rectangle Table with Fixed Legs / 1000 Beech  
Also available in Laminate with Elec/Data/WM Unit and Glass

AV-1210-LAM-AL 112 x 48 Rectangle Table with Fixed Legs and Elec/Data/WM Unit / Grey Laminate  
Also available in Veneer and without Elec/Data/WM Unit

AV-1310-OA-AL 96 x 48 Oval Table with Fixed Legs and Elec/Data/WM Unit / 8502 Black Oak  
Also available in Laminate and without Elec/Data/WM Unit

## AVEA Storage Units...media centers and storage credenza

The large storage unit is offered as a credenza with front storage or as a media center with a lift mechanism that will hold up to a 50" plasma television. It offers flexible storage and a clean aesthetic for the boardroom.

**MEDIA CENTER** — Includes a lift mechanism that will hold up to a 50" plasma television and has both a manual and remote control with infrared sensor on the bottom of the unit. The right side has electrical, data, and wire management and will hold DVD players or other peripherals. Both end units are standard with side locks. Top storage doors lift up, center bottom doors flip down, and the end bottom units are file drawers for ample storage capability.

**STORAGE CREDENZA** — This unit offers flip-up storage on top and drawers on bottom left and right side, two flip-down door fronts in bottom center. Perfect for a buffet or storage unit in the conference room environment.

*large image:* AV-3000-OA-AL Media Center / 8000 Oak / Aluminum

*top small image:* AV-3100-OA-AL Credenza / 8502 Oak / Aluminum

*bottom small image:* AV-3000-MM-AL Media Center / 7000 Maple / Aluminum

## AVEA Conference Tables...mobile media and storage

Additional storage units are available as mobile media centers, mobile storage centers, or a mobile technology cart. The outside wrap of these two cases is made of a material commonly used as cladding in architectural applications... ACM - aluminum composite material. It consists of two sheets of smooth aluminum thermobonded to a polyethylene core.

It is wrapped around in one piece on the side, continues across the top, and down the other side. The front doors or back panel are offered in six veneer options.

**MOBILE MEDIA CENTER** — Contains lift mechanism that holds up to most 42" plasma televisions. Lift mechanism has manual and infrared remote control. Front doors flip-down to reveal storage and grommet holes. Standard with five casters (two locking) and locks on both doors.

**MOBILE STORAGE CENTER** — Offers flip-down storage doors with five casters with two locking.

**TECHNOLOGY CART** — This compact mobile unit has the same ACM aluminum wrap with locking veneer doors on both sides. May be used as a projector stand, lectern, or serving cart. Unit has four casters with two locking.
