

Cable Manager

Primary Customer Need:

Cable clutter is a current and growing problem in the office. Power outlets and/or points of entry are often some distance from where a particular piece of equipment or lighting is placed. When that is the case, it becomes necessary to route cabling. To accomplish this in an unobtrusive way, cable tubing is utilized.

The cable management kit will allow computer users to tag individual cables, tie them into similar function groupings and bundle them all together for aesthetic purposes and neatness.

User Requirements:

A kit containing PVC tubing, labels, plastic ties, and two reusable tie wraps with self-adhesive mounts for organizing and managing computer and lighting cables in an office environment.

Product Features:

- Style Number: TCMK
- Size: 8 feet x 1½ diameter (can be cut to desired length)
- Color: Grey only
- Construction: PVC
- Application: Group and bundle cables in an orderly fashion
- Warranty: 10 years
- Cable Manager includes 32 color-coded labels and two reusable, beaded tie wraps with adhesive mounts.
- Bundles and routes cables from various locations within the workspace.

For a better day at work.™
