NARRATIVE

PAT- Coil Seating/Sleeping Technology

Comfort

Uniquely engineered interlocked coil architecture provides uniform comfort over the entire seating area.

Support

The floating encased coil provides a feeling of weightless suspension, creating a perfect balance of weight distribution.

Durability

Significant increase in long term durability verses conventional foam construction.

Environmentally Friendly

Decreased use of a petroleum based foam product supports a more environmentally friendly solution.

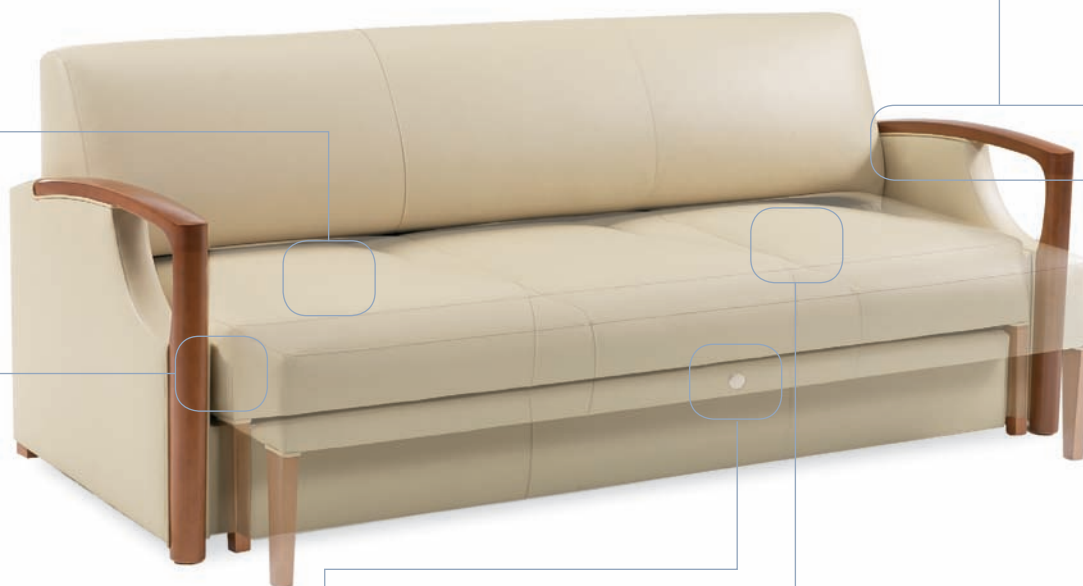

PAT COIL

Seating Comfort

A specially engineered 5 degree pitch in the seat deck of the sofa allows for both comfort and ergonomics in the seating position.

Wood Components

Standard with PAT-Shield, a unique antimicrobial wood finish. This durable antimicrobial wood finish is highly resistant to abrasion and chemical cleaning solutions.

Reduced Room Footprint

The sofa extends from 34" overall depth in sitting surface to 41" in the sleeping position- only increasing depth by 7" therefore allowing for better traffic circulation within the room.

Ease of Operation

A simple pull extends the bed ...there is no heavy or bulky mechanism to hinder operation or to break down in the field.

Sleeping Comfort

Transforms to a flat sleep surface that features the comfort, support, and durability of PAT-Coil seating technology (a construction used in the luxury mattress industry).

Sleeping Position

FEATURES

Complements the broad Narrative Collection of tables, lounge, public and patient room seating.

Additional pieces include lounge seating, multiple seating, occasional tables, recliner, and patient chair.

Lifetime Mechanism Warranty
