# guest center

designed in collaboration with HDR

The patient room Guest Center provides an adaptable environment for family, caregivers and visitors. It combines a work surface with storage, task light and power receptacle for convenient phone, laptop and MP3 charging. Its modular panels accommodate options including specialty materials, tack panels and writing surfaces, and areas for mounting a flat-panel monitor, artwork or accessories. An optional top shelf displays comforting cards, flowers or other personal objects.

The Guest Center is wall mounted, requiring minimal space - utilizing otherwise unused areas of the room. Manufactured with sustainable materials that advance our commitment to create healthy environments. Choice of desktop materials and PPP finishes are available.
