

## Board, meet bright.

See more clearly by pairing any PolyVision interactive whiteboard or panel with the 3M Super Close Projection System. The short-throw projector integrates seamlessly with PolyVision low-glare surfaces. The result? Crisp, bright, shadow-free images.

## Integrated classroom

### Improve the view

The short-throw projection system that reduces glare and shadows; positioning the projector close to the screen means students and teachers can use the board without casting a shadow.

### Utilize your space

Stow the projector against the wall, leaving overhead space clear.

### Incorporate audio

Without any extra equipment, the Super Close Projection System includes built-in high fidelity stereo speakers and an amplifier for interactive lessons with a soundtrack.

### Connect

Integrate the system with computers, television tuners, DVD players, and other audio and video devices for a streamlined multimedia solution.

### Easy on the eyes

Focus on your students, rather than into the bright light of the projector.

## Options

Get more out of the Super Close Projection System with the following:

### Fixed arm mount

Easily installs on a wall over the board.

### Basic or full connectivity

With the I/O module, easily connect multiple computers and other A/V devices.

“The clear, bright picture means that every student has the best view.”
