

Echo™ Projection Screen

Form & Function

Sleek aluminum shell

Unique adjustable-depth wall mount

Project Brilliantly

Need to project images on a wall but there is something in the way?

Meet Echo™.

Project your ideas brilliantly with PolyVision's Echo Projection Screen.

Form Meets Function

Echo is part of PolyVision's Commercial Series of markerboards, tackboards, and projection screens. Designed to complement any environment, with the broadest range of trim styles and the world's leading writing surface - now you never have to choose between form and function.

Visualize your Environment

Echo's simple European design, in satin anodized aluminum, fits anywhere you need to project images. Its unique arms allow Echo to clear items that may be wall-mounted beneath: no need to move them - just adjust the depth of the screen, to a maximum of 14". Available in two sizes.

Unsurpassed Quality

The Commercial Series Echo Projection Screen is backed by PolyVision's Ten Year Warranty on workmanship and materials.

Simple. Effective. Extraordinary.

The way communication should be.
