

“It transformed
my teaching style,
my classroom
and my students.”

Joyce C.
4TH GRADE TEACHER
AMCA—THE ACADEMY

Equip your classroom with 21st century tools that inspire teaching and learning success. At the heart of an interactive classroom are innovative teachers and engaged students. At its cornerstone is the TS Series interactive whiteboard, giving teachers the power to energize classrooms and transform learning.

PolyVision®

bring learning to life™

Educational edge

With the TS Series interactive whiteboard, you can:

Bring your existing web resources and software tools to life. Add class notes, sketches and drawings. Save them digitally and distribute to your students or parents. Use customizable RM Easiteach® curriculum tools to create virtually unlimited lessons and activities. Expand your teaching toolbox with a multimedia library packed full of images and flash activities.

Inspired teaching

The TS Series interactive whiteboard is easy to use and keeps students engaged at every level. Use the touch-sensitive surface to open web pages, highlight lessons, and interact with graphics software using your finger or the stylus.

No software to learn

True plug-and-play capability allows teachers to power up and begin teaching immediately. Relax! No special training required.

Works with all your favorite tools

Including web browsers, Microsoft® PowerPoint® and Excel®, The Geometer's Sketchpad® and more.

Integrated controls

Drive the board at the board—instead of from a computer.

Grow your technology expertise as you go

RM content tools, sample lessons and activities are included for use as your comfort level increases.

Interactive classroom

The TS Series interactive whiteboard offers teachers a multi-sensory medium for turning every lesson into a dynamic one, with practical features that make teaching more efficient.

Capture and save

Print, email or upload all your notes—for easy access and distribution of lesson content.

Connect and go

The PolyVision driver is available on CD to make any computer—teacher's or student's—whiteboard-ready.

Defy wear and tear

Designed to flex under pressure, the board's frame stands up to the rigors of any K-12 classroom. The virtually indestructible Teflon®-coated writing surface has the lowest surface gloss on the market for bright, clear images.

eVision™ PolyVision is committed to move toward sustainability in all areas of environmental stewardship—to protect people, replenish natural resources, and restore the communities in which we work and live.

Intuitive learning

Included with the board, RM Easiteach educational software adds dimension and flexibility to lesson plans. Content tools bring science, math, geography and language arts to life.

- Select from more than 2,000 images to illustrate lessons
- Save time on lesson plans and in class by eliminating the need to write, draw, rewrite and redraw frequently-accessed information
- Increase student involvement and understanding with visual and animated models to represent complex concepts

Combined with the TS Series interactive whiteboard, the Qwizdom® student response system lets you assess retention and comprehension as often as you like.

- Adapt lessons to learning needs
- Increase student participation
- Confirm student understanding

Options

Get greater performance by opting for the following:

Lightning™ one-touch calibration technology

No more tedious, time-consuming calibration—just press a button and the projected image on the whiteboard is realigned immediately.

Bluetooth® communication

Connect the computer to the interactive whiteboard from any spot in the room, no cables involved.

3M™ Super Close Projection System

Focus on your students rather than the bright light of the projector with the 3M short-throw projection system. Move freely without casting a shadow. Use built-in speakers to make audio lessons sing.

the new stuff

Camera phone, headset, mp3, flash drive, Game Boy®, satellite, dvd player, disc burner, GameCube™, Xbox™, PlayStation®, Guitar Hero®, game controller, universal remote, video camera, microphone, webcam, calculator, mime, flat screen, laptop, car video, home theater, downloads, PDAs, wireless headphone, satellite radio, GPS navigation, digital television, trackball, tablet, scanner, digital printer, digital video recorder, ATM.

“My son jumps over the dog,
sidesteps the cat—all on his
way to the computer—to feed
his virtual ferret.”

Steve Cambridge
PARENT of 8TH GRADER

the new student

Texting, surfing, mp3ing, friending, tubing, quick connecting, blogging, reading, instant messaging, chatting, meeting, continuously interacting. All online.

The new student has grown up in a digital world. His brain is capable of listening, texting and learning simultaneously. Her brain is wired for processing, sorting and prioritizing at warp speed. Attention deficit? Not likely. More like attention surplus. At least by old standards. The new kindergartner can load a DVD, take a digital photo, send an email, transfer a file and program his mom's cell phone. The new high schooler can film a scene, edit the video, create a soundtrack, merge the files and show the whole world what she did on spring break. In the digital world, 2.0 means they know more than you do.

And now they're all yours for six hours a day. How will you expand their knowledge and understanding? How will you help them develop critical thinking skills? How will you teach their wired brains?

Hint: not by standing still.

the new teacher

Moving, illustrating, discussing, encouraging, nurturing, showing, demonstrating, prompting, asking. All in the classroom. The new teacher meets millennial students where they are, infusing learning with experience, expertise, excellence. Yours... and ours.

experience

What's demanding your attention today? Challenging students? Concerned parents? National mandates? State tests? Watchful administrators? Special needs? You have to be a master juggler to keep all the balls in the air. But you are, and you do. Your valuable experience makes it work, day after day.

At PolyVision, our experience comes in handy too. We've been in the classroom for more than 50 years with tools that enhance teaching and learning. In fact, the vast majority of classrooms worldwide are equipped with PolyVision whiteboards. Today's interactive tools reach and engage the new very wired, very plugged-in student, hour after hour. Attention surplus? Keep it powered up. Student boredom? Watch it disappear.

“Preparing our kids for the future—it's futile if we aren't ensuring our planet will be a safe, healthy place to live.”

Ray Grennan
SCIENCE TEACHER

expertise

You bring your educational expertise to the classroom every day. You bring your technology expertise as well. Or not. We realize that being a skilled subject expert doesn't make you a high-tech guru. But whether you're a total novice or a seasoned pro, you can start teaching with PolyVision five minutes after powering up for the first time. Six, tops.

Because with PolyVision, no special training is required. So you can use your tried-and-true lesson plans today, and grow your expertise as you go. Our award-winning professional development offerings can help shorten the learning curve. Even if you're starting at Tech 101. *Especially* if you're starting at Tech 101.

excellence

We share your passion for educational excellence. We know teaching today is a tremendous challenge. (Frankly, we don't know how you do it.) And we realize that the best teaching tools in the world are nothing without the skill and commitment of a dedicated teacher.

But for today's wired students, innovative, interactive and highly engaging tools from PolyVision *do* help. They make it far easier to engage, motivate, support, involve, connect, assess and guide. In short, to bring learning to life.

eco-centric

A better world. At the end of the day, that's what education is all about. Preparing students to be informed citizens, better workers, stronger leaders... all in pursuit of a better world.

At PolyVision, we understand the implicit irony in equipping classrooms with less than sustainable solutions. That's why we are committed to moving all products, operations, processes and policies toward the fulfillment of our **eVision™** strategy. Because we know that the first step in preparing children for a better world is taking care of the one we have.

TS Series interactive whiteboard

With true plug-and-play features and one-touch calibration, the TS Series interactive whiteboard is up and running in minutes—no special training or software required. The intuitive, integrated controls allow both teachers and students to write notes, edit information, advance slides, save problems and more at the touch of a finger. So simple, even an adult can do it.

Walk-and-Talk™ interactive whiteboard

With the writing surface of a whiteboard, the control of an interactive computer screen and photographic memory, the Walk-and-Talk interactive whiteboard allows teachers and students alike to present, share, add, delete, send, receive, annotate, capture, divide, compute, illustrate, animate, surf, browse, download, upload, transfer, well... you get the picture.

Walk-and-Talk™ interactive panel

With a stylus and the remote control, the instructor can share notes on the big screen without leaving the podium... or advance slides and lead discussion from any corner of the room. Frequently selected for auditorium-style classrooms, theaters and lecture halls, the Walk-and-Talk interactive panel transforms traditional educational settings into digital learning environments.

the new classroom

Simply touch the green sphere on the facing page.

Poof.

A state-of-the-art digital classroom appears.

We wish. You wish.

Technology is not quite there yet. But we're working on it.

As one of the companies owned by Steelcase Inc., the world's largest manufacturer of environments for working and learning, we partner with world-class visionaries and researchers, designers and builders, dreamers and doers. Together, we work to envision solutions to meet the needs of educators and students in the 21st century.

Then, we tackle our assignment: developing the very best classroom tools that we can imagine and create. To equip today's teachers and tomorrow's citizens.

And bring learning to life.

Our team of professionals will happily assess your needs, identify your objectives, present good options, and provide helpful guidance.

Because they're teachers too. ;o)

easy, exceptional, expert

... so many e's, so little time.

Oh, how we could expound. By explaining how easy it is to work with us. Or enticing you with our exceptional knowledge. Or perhaps engaging you in expert explanations of e-learning.

But enough of that.

We know that for educators, extra time is elusive. So for efficient enlightenment, here's an elementary encapsulation:

interactive classrooms

Bluetooth® Wireless Technology

For TS Series Interactive Whiteboards

Bluetooth Module for TS Series Interactive Whiteboard

Bluetooth Module Installed on TS Series Interactive Whiteboard

Bluetooth®

Bluetooth® wireless technology is now available for use with all TS 400, 600 and 800 Series Interactive Whiteboards.*

Bluetooth is the ideal solution for convenient, cordless, short-range communication between devices, such as interactive whiteboards and computers. It is the leading short-range wireless technology on the market today and has achieved global acceptance. In addition, it is easy to install and use and does not require additional driver software to be installed.

* Excludes TS Series Interactive Whiteboards manufactured before Nov. 1, 2006. Not compatible with: TS 410, TS 610, TS 810, TSL 410, TSL 610, or TSL 810.

Features

- Robust, low power, and low cost
- 30' range
- Easy to install
- Works worldwide and connects to most Bluetooth enabled computers
- Powered from whiteboard
- Slim line design

Benefits

- Mobility
- Provides a clean look by eliminating a cable
- Eliminates trip hazards
- Allows computer to be used anywhere in the room

Part Number

- TS BT

Certifications

- RoHS, CE, FCC

Simple. Effective. Extraordinary.
The way communication should be.

Environmental Policy: PolyVision strives for continuous improvement in all areas of environmental stewardship – responsible use of raw materials and natural resources, design processes and operation of all facilities – to protect, replenish, and restore the communities in which we live and serve.
