## 70 SERIES CABINETS BY **softcare**

The Davenport Series is designed for the ultimate in ease of use and brings together quality, style and affordability.

The design of the series features a unique off the ground leg style, with distinctive bow front tops and complementing curved stainless finished handles. Davenport cabinets are constructed using Thermo set melamine panels throughout, with 3mm (1/8") edging on the tops and front edges of the legs with 1mm edging on all other panel edges.

The Davenport Series also offers the ability to have contrasting SUPER LAM tops and legs with durable edges.

SUPER LAM is a new, proprietary horizontal surface material. It is highly "wear resistant" material that features high impact scratch and abrasion durability. SUPER LAM conforms to a number of key industry performance standards related to High Pressure laminate work surfaces.

Choose from 20 spectacular finish colors.
