LOUNGE SEATING BY **softcare**

Hallmark seating is perfectly suited for lounge areas. Single and wide models are available with a high or low back in addition to modular two and three seat units with individual seats and arms.

Hallmark's small scale design allows for many more flexible placement options than a full size lounge chair.

Seams are designed to be smooth without welting for ease of cleaning and to reduce picking.

The soft seat provides comfortable long-term seating while the ergonomic back gives excellent support.

Solid Maple legs are tapered to give a universal style that can be considered contemporary or traditional, depending on fabric and finish selections.

The top of the back features a unique rolled curve that acts as a grip and allows the caregiver to easily move the chair. Hallmark arms are rolled and extended forward which provides residents with a solid area to grip for support when exiting from the chair.

Hallmark seating complements Softcare's Traditional Lounge Furniture.

SC-3005 – Highback

SC-3004 – Lowback

SC-3005-2 – Highback 2 seat modular unit

SC-3024 – Lowback wide model
