inclination recliners

BY softcare

The Inclination recliner has an attractive, contemporary style with unique characteristics. With a softer seating area and more padding on the top of the arm and leg areas, Inclination is extremely comfortable and functional. The extra support allows for long-term seating and greater comfort while undergoing medical procedures.

Inclination reclines by gently pushing back on the arms into a "T.V. watching position" with the footrest extended. By pulling the tab located to the right of the seat the back can be further inclined.

The smooth incline action is assisted by a pneumatic gas cylinder, which has an infinite number of stop positions and aids in returning the recliner to its original sit position.

The unique all-steel European recline mechanism will allow the back of the chair to incline when the footrest is not extended, making this recliner very versatile.

Rolled arm and flat arm styles available with optional flip-up tablet. An external activation lever mounted at the left rear is available on SC-2077 and SC -2078.

SC-2078 with flat arm design and flip-up tablets

SC-2076 with 3" non-marking medical casters

treatment recliners

BY **softcare**

Developed for heavy use in hospitals and nursing care applications, these steel frame chairs are designed with a molded contoured backrest providing excellent support and comfort.

Options include:

- Maple wood arm caps
- IV rod holder
- Headrest pillow
- Flip-up tablet
- Lateral transfer removable left arm

Extra wide model with 24" space between the arms (standard model measures 20" between the arms).

Constructed on steel frames molded into CFC-free, fire retardant H.R. cold curved urethane foam, the 6530/35/40/45 group features field recoverable, replaceable seat and back, the seat and footrest cushion is one piece with no spaces between leg and footrest.

Trendelenburg models SC-6540 and wide model SC-6545 feature a pneumatic gas cylinder which provides an assist in raising a patient's body weight and reduces the amount of lifting needed by the care giver. All treatment recliners feature 3" heavy-duty non-marking casters, rear casters are locking (both swivel and wheel)

SC-6540-U Treatment recliner with Trendelenburg

recliners

SPECIALTY SEATING BY **softcare**

The Softcare recliner features a 3 position recline function which permits a nearly flat full recline position. The unit has excellent foot rest pitch and support in the TV position plus the full layout recline position for added comfort. It also has a mid-ottoman feature for greater footrest stability and safer small opening between foot rest and seat.

Options include:

- Full flat recline
- Wings
- IV rod holder
- Flip up tablet
- CAL 133

Flammability – Standard foam meets California Technical bulletin 117 requirements and with the optional CAL 133 interliner and appropriate fabric, it will meet 133 requirements.

SC-2072 Wall Saver Recliner

The Wall Saver recliner reclines to allow less room between the wall and the recliner. This will allow you to gain more floor space in a patient room.

Lateral transfer removable left arm.

Maple wood arm caps.

SC-6540-U Treatment recliner with optional IV rod holder and flip-up tablet.

SC-2071-W Recliner with Maple wood arm caps

SC-2070 Recliner with optional IV rod holder and flip-up tablet
