

Media

Rethinking the office

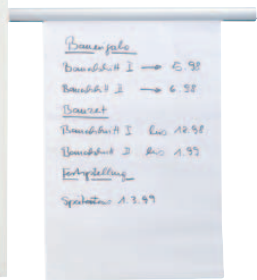

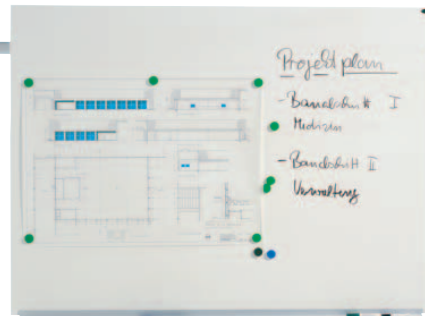

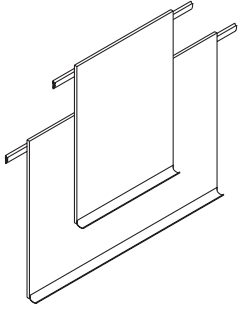

Let's meet!

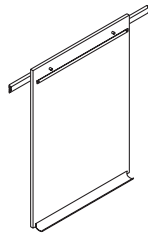

Presentations, meetings, conferences – all rely heavily on multimedia support. Permanently installed equipment is often not available where it is needed or is standing in just the wrong corner. So when it comes to creating the impression you want, you benefit not only from the versatility of modern media but also from the flexibility of our media furniture. Quickly where you want it, naturally height adjustable, and ready to be stacked up with all sorts of necessary items – a projector, a laptop, or even your own papers. Our mobile range enjoys solid support from a range of accessories such as flip charts, pin boards, media carriers, and our elegant shelving system, Tokyo.
