

Tokyo

Rethinking the office

So many interesting faces to

filing and storage,

Tokyo is characterized by perfect craftsmanship from top to bottom. Its metal frames are stable and solid. The shelves slot in for a perfectly flush surface. Each unit stands on glides, transparent or black. Casters can be specified to ensure easy mobility. Open shelves provide

unobstructed views while translucent glass panels let out only a hint of what is behind them.

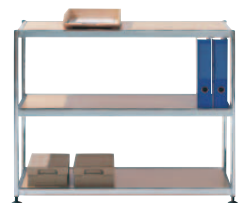

Tokyo metal frames come in metallic aluminum or graphite powder coat colors.

The panels and doors come in soft green translucent glass or in powder-coated steel.

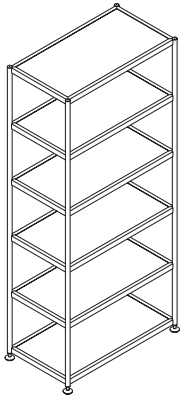

Tokyo offers powder coat in a choice of ten colors. Shelves are available in laminate, wood veneer, powder coated steel, or glass in green or blue.
