

TECHNOLOGY

BY ONE WORKPLACE

WHEN THE DIGITAL & PHYSICAL WORK TOGETHER, YOUR BUSINESS WORKS BETTER.

Today technology does more than keep the lights on.
It transforms the way we work.

At One Workplace, we blend physical space with technology to create environments that help organizations work better today and anticipate future needs with an integrated approach.

By integrating connectivity and cloud-based applications, employees can have instant access to the information they need, wherever they need it.

Our security solutions blend passive elements like walls, dividers, and exits with active security components like cameras and electronic access, to work seamlessly within your environment.

Intelligent soundscapes combine the restorative power of nature with cutting-edge technology, so your team can do their best work every day with the right balance to support wellness and productivity.

And we do it all sustainably - delivering better communications, frictionless collaboration, and the flexibility to evolve over time with your business needs.

- Wireless Access Points
- Cable Connectivity

Space Analytics

- Occupancy and Usage Studies

OUR SERVICES

Consulting

We strategize with you to determine the best technology to implement based on a needs assessment before construction begins. This process ensures that your solution is more efficient, saves time and money, and meets the needs on the first day of business.

Design Build

Our technology staff of certified, highly trained professionals can manage the process from design through installation, from estimation through post construction. Having a single point of contact keeps the process simple and efficient.

Program Management

Whether you're creating a new facility or renovating an existing space, great workplaces require constant change. Our project managers and engineers can help you stay one step ahead by working directly with architects, general contractors, and facilities management to deliver the best technology available on time.

Ongoing Services and Onsite Support

When your technology stops, everything stops. Our job is to make sure it stays in sync and if problems happen, they can be fixed fast. From remote management and help desk support, to on-site staffing, moving, or standby backup for special events, our ongoing services ensure your technology is always covered.
